

Research Grant Expenditure – User Feedback

Listed below is some of the user feedback received in relation to the Research Grant Expenditure application. If you have any comments (*both positive and negative*), please send them to research_expenditure_support@admin.cam.ac.uk

My first reaction is 'Wow!!!' this is a tool that has been needed by departments for a very long time, and promises to be absolutely invaluable....
Wonderful!
should save us literally hours of work trying to recreate in various spreadsheet formats, or on local systems
I really like it - much better than Cognos (in my opinion)
Very quick and intuitive and plenty of detail! Love the graphs
Looks very promising.
A very useful tool, especially for the things that CUFS can't do, such as manual commitments and the graphical projections
Very easy to use and I can't say I really struggled with any of it
Provides all the information that I would need access to and I would definitely use it instead of CUFS
What a brilliant tool - exactly what I need!
This is a very helpful tool.
